The employees in tourism and catering in Athens, express our solidarity with our colleagues from Italy and USB.

We welcome tomorrow's mobilization of tourism workers in Italy and express our support to their fair fight to ensure their jobs and income.

The workers in the tourism sector around the world are facing the policies of governments who defend the profits of the big monopoly groups that want to load the new economic crisis on us, since all the previous years they made huge profits from our work.

With the continuation of our mobilizations, we unite our voices with your struggle and that of our colleagues around the world.

With our solidarity and unity we will win!
